

ATOCHA SUNK!

1623 ENGLISH TRANSLATION OF THE SPANISH ACCOUNT OF THE TREASURE FLEET TRAGEDY IN THE AMERICAS.

This is a reprint of the Handbill printed in London which relates the particulars of the great loss of life and ships during the Caribbean hurricane of 5 September 1622. A duplicate of “original research” material, this news medium of old lists those who perished and those who survived this disaster—down to the details of each one’s position or occupation...and where they lived in Spain!

An Introduction by Ernie “Seascribe” Richards explains how to read and understand the Old English in which the handbill is written. Not only is this a necessity for your **ATOCHA** collection, but this document will give you insight into the skills required by the researchers who study and find ancient shipwrecks in the New World. Educational and entertaining as well.

Out of print for over 375 years, “A TRVE RELATION OF THAT WHICH LATELY HAPNED TO the great Spanish Fleet and Galeons of *Terra Firma in America*” will grip you with its personal insight and contemporary feeling. Buy this 34-page piece of history here, and begin a reading adventure now!
